

ONLINE FOOD ORDERING WEBSITE

Software Details

e-Foodie is based around three main features - simplicity, ease of use, and innovation. It is an innovative hospitality solution that has been expressly developed to fulfil all online food ordering requirements of restaurants and food joints.

A great looking website with well organized restaurant menus, photo gallery, directions, coupons, events promotions are the basic features this website can have

Features :-

- Simple user-interface Admin Panel for creation and configuration of menu groups, menu items, etc.
- Built-in facility to set modifiers on different menu items
- Centralized Food Ordering System (CRS) to control and supervise multiple restaurants centrally as well as individually
- Detailed summary of orders placed with option to update order status, print orders, print Kitchen Order Tickets (KOT), etc.
- Various reports to view total sales, details of registered members with facility to print report or export all data into MS Excel (.xls) format.
- Online payment processing for orders (Optional)
- Integration of multiple payment gateways including PayPal, Google Checkout, Credit Cards (data capture only), etc. (Optional)

Advantages :-

- Completely automated online ordering of food for a restaurant
- Commission FREE and unlimited orders
- Food ordering pages that look and feel exactly the same as the existing restaurant website
- Food ordering pages hosted on secure and special server so no risk of customers getting redirected to servers where competitors' websites are listed
- Based on Model-View-Control (MVC) architecture for ease of updates and modifications
- Developed using the latest website programming protocols for minimum server loads and ultra-fast loading and processing
